

# HAM Operator Accessory Kit

	<p>A dual band, mag mount antenna will increase your coverage area. You may use it in your car or in the house.</p>
	<p>A speaker mic is easier on the hand and allows you to have your speaker volume lower.</p>
	<p>Use a headset boom in noisy locations or where there are multiple operators.</p>
	<p>A more discreet version.</p>

You will find uses for all of the above at one time or other and you'll be glad you have them at the time you need them.
